10. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Notes, the Notes will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under

these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Notes for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Notes.

Qualifications in audit report on historical financial information:

Not applicable; there are no qualifications in the audit report of GSI on its historical financial information.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

¹ "Fees and commissions" are included within "non-interest income" and therefore are not included as a single line item.

² "Subordinated loans" are included within "total unsecured borrowings" and therefore are not included as a single line item.

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

The currency of the Securities will be Norwegian Krone ("**NOK**"). The calculation amount is NOK 20,000. The aggregate nominal amount is up to NOK 200,000,000.

Maturity Date: October 8, 2029. This is the date on which the Securities are scheduled to be redeemed, subject to adjustment in accordance with the terms and conditions and subject to an early redemption of the Securities.

Rights attached to the Securities:

Return on the Securities: The Securities will give each investor the right to receive a return, together with certain ancillary rights such as the right to receive notice of certain determinations and events. The return on the Securities will comprise the potential payment of (i) the Autocall Event Amount (if applicable), or (ii) the Final Redemption Amount (if applicable), and the amounts payable will depend on the performance of the following Underlying Asset:

Underlying Asset	Bloomberg / Reuters	Index Sponsor
iSTOXX AI Global Artificial Intelligence High Dividend 30 Index	SXAAIHDP <Index> / .SXAAIHDP	STOXX Limited

Autocall Event Amount: on an Autocall Observation Date, if the Reference Price of the Underlying Asset is greater than or equal to the applicable Autocall Level in respect of such Autocall Observation Date, then the Securities will be exercised early and the applicable Autocall Event Amount will be payable in respect of each Security on the following Autocall Payment Date.

Final Redemption Amount: Unless previously redeemed, or purchased and cancelled, the Final Redemption Amount payable in respect of each Security on the Maturity Date will be calculated in accordance with the formula below:

$$CA \times \{PL + [P \times \text{Max}(0; \text{Perf} - \text{Strike})]\}$$

Non-scheduled Early Repayment Amount: The Securities may be redeemed prior to the scheduled maturity (i) at the Issuer's option (a) if the Issuer determines that a change in applicable law has the effect that performance by the Issuer under the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful in whole or in part ("**Change in Law Event**"), or (b) if the Calculation Agent determines that an index adjustment event (being a cancellation, material modification, failure to publish or an administrator/benchmark event) has occurred in relation to the Index and that replacing the Index and adjusting the terms and conditions of the Securities would not achieve a commercially reasonable result or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.

In the case of an unscheduled early redemption due to a Change in Law Event which renders the continuance of the Securities definitively impossible (a "**Force Majeure Event**"), the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, an amount determined by the Calculation Agent to be the fair market value of the Security on the second business day prior to the date that the Issuer or Calculation Agent (as applicable) determines that the Securities will be early redeemed (taking into account the remaining present value (including the present value of the future selling commissions payable to the distributor (the "**Distributor**") (if any))) (such amount, the "**Fair Market Value**").

In the case of an unscheduled early redemption due to a Change in Law Event which does not render the continuance of the Securities definitively impossible or following an index adjustment event (each such event, a "**Non-Force Majeure Event**"), the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be an amount determined by the Calculation Agent in accordance with the following in relation to each Security:

- (a) where the Holder has exercised its right to early redeem such Security in accordance with the terms and conditions, an amount, payable on the early redemption date specified in the notice from the Issuer, equal to the sum of (a) the Fair Market Value, plus (b) a pro rata share of the total costs of the Issuer (for example, structuring costs but excluding selling commissions paid or payable by the Issuer to the Distributor) paid by the original holders of the Securities as part of the original issue price of the Securities, as adjusted to take into account the time remaining to maturity (the "**Pro Rata Issuer Cost Reimbursement**"); or
- (b) otherwise, an amount equal to the sum of (a) NOK 20,800 plus (b) the present value (if any) of the option component or embedded derivative(s) of such Security at or around the date on which the Issuer gives notice of the early redemption event, *plus* (c) the present value of the future selling commissions payable to the Distributor (if any), *plus* (d) the Pro Rata Issuer Cost Reimbursement, *plus* (e) accrued interest (if any) on such present value (if any) of the option component or embedded derivative(s), such present value of the future selling commission payable to the Distributor (if any) and such Pro Rata Issuer Cost Reimbursement up to, but excluding, the scheduled Maturity Date, and such amount as described in this paragraph (b) will be payable on the scheduled Maturity Date,

PROVIDED THAT in the case of unscheduled early redemption due to a Change in Law Event which does not render the continuance of the Securities definitively impossible, the Issuer may determine instead to redeem all of the Securities on the early redemption date specified in the notice from the Issuer and for an amount equal to the *sum* of (a) the *greater* of (i) NOK 20,800 and (ii) the Fair Market Value and (b) the Pro Rata Issuer Cost Reimbursement.

In the case of an unscheduled early redemption upon notice by a Holder following an event of default, the Non-scheduled Early Repayment Amount payable shall be an amount determined by the Calculation Agent to be the fair market value of the Security as of that day (taking into account the remaining present value (including the present value of the future selling commissions payable to the Distributor (if any))).

A Holder of a Security will not be charged any costs (such as settlement costs) by or on behalf of the Issuer to redeem the Security prior to scheduled maturity or to change the terms and conditions of the Securities.

The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.

Governing law: The Securities are governed by English law.

Status of the Securities:

The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding.

The taking of any action by a resolution authority under the Bank Recovery and Resolution Directive, in relation to the Issuer could materially affect the value of, or any repayments linked to, the Securities, and/or risk a conversion into equity of the Securities.

Description of restrictions on free transferability of the Securities:

The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the "**Securities Act**") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws. No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations. Subject to the above, the Securities will be freely transferable.

Where will the Securities be traded?

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Luxembourg Stock Exchange with effect from at the earliest the Issue Date.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

Risks relating to certain features of the Securities:

- The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. You could lose some or all of your investment in the Securities where your Securities are redeemed early due to an unexpected event and the amount you receive is less than the original purchase price.
- The terms and conditions of your Securities provide that the amount payable on the Securities (whether at maturity or otherwise) will be based on the arithmetic average of the applicable levels of the Underlying Asset on each of the specified averaging dates, and not the simple performance of the Underlying Asset over the term of the Securities. An averaging feature could result in a lower value of and return on the Securities than if there was no averaging feature. For example, if the applicable level of the particular Underlying Asset dramatically increases on an averaging date (but not the other averaging dates), the return on your Securities may be significantly less than it would have been had it been linked only to the applicable level of the Underlying Asset on that single date.

Risks relating to the Underlying Asset:

- *The value of and return on your Securities depends on the performance of the Underlying Asset.* The return on your Securities depends on the performance of the Underlying Asset. The level of the Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of the Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the level, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of the Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Asset as indicative of the range of, or trends in, fluctuations in the Underlying Asset that may occur in the future. The Underlying Asset may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of the Index is dependent upon the macroeconomic factors relating to the shares that underlie such Index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as the index composition, which may change over time.
